

SAY, SUPERVISORS AGAINST THE DEPORTATION TRIALS

DOUGLAS, Ariz., July 24.—C. E. Adams, chairman of the board of supervisors, of Bisbee, was in the city yesterday, being called here on road business to meet County Engineer Smith. While here the financing of the prosecution of the deportation cases now before the justice court, in this city was brought to his attention by witnesses taking up with him the matter of their expenses. He said that the board had been requested by the county attorney's office to open an account at one of the banks here, supply it with money and allow the county attorney to draw on it for the expense money required for witnesses brought here to testify on behalf of the state, but that this could not be done, as each item for such expense must be passed upon by the board as a separate demand. Mr. Adams, in speaking of the expense of this deportation prosecution said that some palpable falsehoods have been published in other counties of the state about the actions of the board and one that he especially resents is a story to the effect that the Cochise county supervisors had thrown the treasury of the county open for use in the prosecutions. Mr. Adams said that so far as he was concerned, and he believed other members of the board would agree with him, that legal demands presented with the endorsement of the county attorney would be paid, but that no money would be dished out for that or any other purpose except on a regular and legal demand.

Mr. Adams said that the county attorney had been provided with what the board thought was sufficient to meet the expenses of that office during the coming year, but that this money could not be used except on bills duly audited by the board of supervisors. Mr. Adams said that so far as the board of supervisors are concerned he does not believe that a single member of it is in sympathy with the wholesale arrests made in the prosecution of those responsible for the deportation in Bisbee two years ago.

Speaking of the road work in the county Mr. Adams said that recent storms and flood water had done considerable damage, but that nothing serious had occurred anywhere. He pointed out the necessity for a bond issue in this county, as now being worked out so that a substantial road can be constructed from Douglas through the Sulphur Springs valley to Wilcox and on to the Graham county line. This, he said, with the completion of the Borderland route through the county would provide the two principal trunk lines of road east and west and north and south through the county. The road from Bisbee to Benson is now completed and the money will be forthcoming for the completion of the paved link between Douglas and Bisbee. With the bond issue as proposed, Mr. Adams says that after the permanent roads are constructed the money to be raised by the road tax levy in the future would be sufficient to keep the roads in repair. He thinks the upkeep of roads is fully as essential as the original construction of them.

WINS DRILLING CONTEST

The Cochise drill, invented about three years ago by C. A. Hultquist, former master mechanic of the Calumet and Arizona Copper company at Warren, won first place in a drilling contest against a field of all other makes at Tonopah, Nev., on July 4 and 5. The Cochise proved its superiority with an entry of only seven drills and it took first and second places while the Sullivan, with 16 drills, took third and fourth places.

"PIONEER DAY" IS OBSERVED IN MESA

MESA, Ariz., July 24.—"Pioneer Day" was celebrated here today with a program of music and addresses commemorative of the efforts of the early comers to the state to reclaim the desert and build homes.

Of the original party of Mormons who came overland from Utah and Idaho to settle in the Lehi and Mesa districts, five still are alive. Some of these were present at today's exercises.

KAY COMPANY IS DEVELOPING A BIG COPPER PROPERTY

PHOENIX, July 20.—One of the great copper mines of Arizona is being developed by the Kay Copper Co., in the Black canyon section, about 59 miles north of Phoenix, in the extreme southern point of Yavapai county. Immense bodies of concentrating sulphide ores have been developed to the depth of 500 feet and the plans contemplate expenditure of about \$800,000 before any material return shall have been received from the ores. The ore bodies have been developed to some extent for a length of about a mile and a half. The lenses are large, with assays that pass 7 per cent, though the milling averages will be somewhat less. As a milling proposition it is believed one of the very best in the southwest. Though development work is far from the stage wanted by Manager George W. Long, plans are being made for a 1000 ton concentrating mill. The mine, a short distance from Canyon station, on the Black canyon road, is favored in that it lies on the line of the route believed selected for the Douglas railroad from Phoenix to Clarkdale, in the Verde valley. In the event this railroad is not built, it is planned that the mining company shall build its own railroad to Glendale, on the Santa Fe, 45 miles distant over an easy route.

Another mine of large local importance is the Red Rover, 59 miles to the northeast. It is an old property, worked 40 years ago and has a large acreage, with extensive development work done. On the dumps is ore valued at \$200,000 and opened in the mine about \$1,000,000 more. The property now is owned by F. A. Gillespie, of Tulsa, Okla., with his son, B. A. Gillespie, in local charge. Very high grade copper silver ore has been found at several points of development, but the management is working toward the opening of large bodies of lower grade, with intention of early installation of a large mill. Transportation now is by means of motor trucks.

North of Hot Springs Junction a remarkable gold strike, at slight depth is reported.

RICHMOND BASIN IS ACTIVE AGAIN

GLOBE, Ariz., July 20.—Richmond Basin again is active, with the rise in silver value. Nearly 40 years ago the basin was even more noted for silver production than was the Silver King. Several hundred thousands of dollars' worth of native silver was taken from the surface of the Silver Nugget claims—simply loaded into wagons and hauled away.

The Mack Morris was a large producer and rich leads were worked on a number of other mines. Two of the old mines, the Emmaline and Blue Bird, lately have been taken under lease by a Colorado company, represented by George Dunlap, of Denver, who is bringing in new machinery, necessary for development of the long abandoned properties. In the same locality a 20 ton cyanide mill has been started on the Jumbo property by Charles Bassonette for the next 12 if a large dump of low grade ore.

The Miami Mining and Milling company has bought the 250 ton mill of the Arizona Butte company and is having it hauled to its property near Doak. The first unit, or 50 tons capacity, is to be started soon on Miami ore.

Bornite has been cut at 200 feet in a drill hole on the Louis D'Ore claim of the Inspiration Miami company at Miami.

The Superior and Boston fire has proven less damaging than at first feared, having been bulkheaded off on levels below the 600 by a crew of helmet men from the Old Dominion mine. The cause is assumed to have been lighted candles left by a leaching gang.

SINKS SHAFT ON ARIZONA MINE IDLE FOR 23 YEARS

The Lyman syndicate of Jerome, Ariz., is sinking a shaft on the Blue Nose group of silver claims in Santa Cruz county. This property, which has been idle for nearly 23 years, was recently acquired from John Hoy, of Harshaw.

ARIZONA RIFLE TEAM TO SHOOT AGAINST NATION'S BEST CRACK AGGREGATION

TUCSON, July 21.—The Arizona rifle team that will take part in the National Rifle association matches to be held at Caldwell, N. J., August 4 to 30, was announced yesterday by Secretary George J. Roskrug, of the National Rifle association, who was asked by Governor Campbell to select the team.

The personnel of the team and the club from which the members were chosen follow:

Tucson Rifle club—Savage, Croyle, Gould, Masten, Roskrug, quartermaster.

Douglas Rifle club—Sexton, team captain; Wilson, Reynolds.

Ajo Rifle club—Frasne, Scott.

Tombstone Rifle club—Almy, H. M. Wheeler, Kendall, Abell.

Phoenix Rifle club—La Tourette, Henderson, Goodall.

The Tucson members of the team will leave here on the morning of July 30 and will be joined at El Paso by the other members of the team, which will then proceed to Chicago and New York, Caldwell, N. J., being only 50 miles from New York.

"I believe it is the best team that Arizona ever sent to a national rifle shoot," said Secretary Roskrug, "and I expect they will bring something back to attest their prowess with the rifle."

FORTUNE AHEAD FOR YUMA MEN

YUMA, July 21.—Oscar Zaph, formerly manager of the U. S. employment bureau of Yuma, received word yesterday from his partner, G. C. Crow, formerly assistant yard master stationed at Yuma, who at the present time is in Texas, that their oil property had been taken over by Wall Street capitalists and is a "sure go."

Some time ago Mr. Zaph and Mr. Crow purchased thirty acres of oil land near Iowa Park. On the land at the present time is an oil well which is down 800 feet and from which there is obtained 100 barrels of oil per day. Not satisfied with one well on the thirty acres, the two men decided to interest "big money" in their property with a result a "deal" was made during the middle of last week whereby certain men prominent in Wall Street decided to back the property to the limit. More shallow wells will be put down on the property and at the same time a deep test well will be put down also. It is believed by people in the Iowa Park field that the same deep oil strata which made Burkhurnett famous underlies the Iowa Park field. At the present time five deep test wells are going down near Iowa Park and if deep oil is encountered the thirty acres of land owned by Mr. Zaph and Mr. Crow will be very valuable.

Mr. Zaph is a former Cochise resident, living at Bisbee, and was candidate for the lower house of the legislature at the last election. His friends will be pleased to hear of his good fortune.

BISBEE AFTER CAR LOAD LOT U. S. FOOD

BISBEE, July 20.—Mayor Erickson stated last night that he had taken up the matter of securing some of the government food supplies for the city of Bisbee and expected to put the proposition to the local mining companies and in conjunction with the city expects to secure several car loads of the supplies.

The war department sells in car load lots only and refuses to sell mixed cars. Mayor Erickson states that the goods bought must be paid for within ten days and that they can be secured from the zone supply officer at El Paso.

Pressure is now being brought to bear on the war department to bring about a modification of these rules, so that purchases can be made in less than car load lots, but at present the rules call for car load lots only.

Other cities have purchased supplies in this manner and some Arizona cities have already received the supplies so that Mayor Erickson feels confident that the saving in prices will be sufficient to warrant the city of Bisbee attempting something of this kind.

SNOW AND RAIN DO HEAVY DAMAGE IN NORTHERN ARIZ.

FLAGSTAFF, July 20.—The first snow since last winter was falling today on San Francisco mountains, at the foot of which Flagstaff is situated. The San Francisco peaks are covered white, and melting snow and heavy rains in this vicinity have made Flagstaff river and other streams raging torrents, with fear that serious floods may result.

The Santa Fe railroad is said to be battling the most severe washouts in many years. A washout between Houck and Chambers, about 40 miles east of Winslow, has delayed all main line transcontinental trains. A bridge and several miles of track are washed out there, according to reports.

All westbound trains are being held east of Chambers, while eastbound trains are held at the division point of Winslow, it is unofficially reported in railroad circles here. No westbound transcontinental trains have passed through Flagstaff since Friday night, and it was announced at noon today that it will probably be at least 36 hours before traffic is resumed.

Three bridges were washed out on the Santa Fe branch line running from Cedar Glade to Clarkdale, and to get to Clarkdale now it is necessary to take a stage from Jerome.

Landslides of rock and gravel are reported to have covered the track between Cedar Glade and Clarkdale to a depth of from eight to ten feet for a distance of two miles. Gangs of men working with steam shovels are endeavoring to remove it.

The total rainfall at Flagstaff since the opening of the "rainy season" on July 2nd has been seven inches. This is almost two inches more than the normal for July and August, which is five and 9.106.

CANTALOUPE HAVE GREATEST SEASON

PHOENIX, July 21.—Never before have Arizona cantaloupes made as fine a showing as they have this year in the Salt River valley, says the weekly press letter of the university of Arizona.

The bulk of the crop was moved before the recent heavy rains in the valley so the damage was not as great as would have been otherwise.

The prices have been good, the yield satisfactory and the pack put up by the growers better than ever before. This will go far toward helping to find satisfactory markets next year. Shortly before the recent rains 150 to 200 cars of cantaloupes were moving daily from the Salt River valley where 4500 acres were planted.

According to L. M. Harrison, field agent for the bureau of crop estimates the cantaloupe shipments would this year be about twice as large as last year when 117 cars were shipped.

This estimate was made public before the recent rains which caught the last end of the crop and which no doubt will cut the total down considerably.

TO BLOW THINGS UP WITH FEDERAL T. N. T.

PHOENIX, July 21.—Thomas Maddock, state engineer, recently received an inquiry from the acting director of the federal bureau of good roads, P. St. J. Wilson, asking how much trinitrotoluol (T. N. T.) he could use in road construction. Maddock asked for 30,000 pounds, and directed the shipment to the various points in the state where there are rock cuts to be blasted out. This quantity is worth at least \$400,000, and will be a fine addition to the federal aid funds and federal equipment being received by the state to use in road construction.

T. N. T. is not only good to blast homes out of their trenches and wreck their fortifications. It is also good to blast out rock in road building. In fact it is something like twice as powerful as commercial dynamite, and the government has about 3,000,000 pounds of it, of which great quantities are stored at Fort Wingate, New Mexico.

GLOBE COUNCIL SCORES I. W. W.

GLOBE, Ariz., July 24.—The Globe city council met in regular session this evening and passed resolutions commending the working men of this district for their attitude in refusing to recognize the I. W. W. agitator.

JUDGE PATTEE TO HEAR SUIT TO EXERCISE PREROGATIVES AS NORMAL BOARD MEMBER

PHOENIX, July 21.—Following the presentation Saturday by the defendants in the L. B. Whitney vs. Prescott Journal-Miner and Northern Arizona Bar association, \$100.00 alleged libel action, of an affidavit alleging prejudice on the part of Judge Stanford of the superior court and asking that another judge be appointed to try the suit, Judge Stanford today named Judge Pattee of Pima county.

Claims Stanford Prejudiced. The affidavit, made by P. A. Mines, secretary to Governor Campbell and formerly news editor of the Journal-Miner, who also is named as a defendant in the suit, was couched in the usual legal phraseology and imputed prejudice to Judge Stanford.

Counsel for the defendants today asked that Judge L. J. Man, of Phoenix, be appointed to hear the case, but to this plaintiff's counsel objected, contending for the appointment of a judge outside of Maricopa county.

The suit grew out of the report of the proceedings of the Northern Arizona Bar association and an article in the Journal-Miner following Whitney's appearing for the plaintiff in a damage action against a Jerome mining company.

TOMBSTONE TENNIS CLUB PLAYS AT FT. HUACHUCA.

Sunday K. N. Coplen and C. J. Wynn of the Tombstone Tennis club went to Fort Huachuca, where they played three matches with members of the Officers' Tennis club of the Fort. They were pitted against Capt. Goddard, athletic director of the post, and Dr. Kosler, two of the best players at the Fort, and the three games resulted as follows in favor of the Ft. Huachuca men: 1st game, 7 to 5; second game 6 to 2; third game, 6 to 4. The Tombstone men considered themselves fortunate in keeping the scores so close, despite the fact that this was their first time on a cement court. They report a royal time at the hands of the Ft. Huachuca members, and that the Officers' team will come to Tombstone within the next several weeks to play another series of games on the local court, which will be completed within a few days. The local team is practicing hard in an effort to carry away the honors from the visitors.

Kingman—New mill of McCracken mine proving complete success. Vein drift in 150 level of Toms mine now 55 feet in ore.

UNITED STATES LAND OFFICE, PHOENIX, ARIZONA

State of Arizona

TO WHOM IT MAY CONCERN:

Notice is hereby given that the State of Arizona, under the provisions of the act of Congress, approved June 20th, 1910 (36 Stat. 557), has filed in this office its School Indemnity Land Selections applying to select as indemnity the lands described as follows:

1197-44228. In T. 15 S., R. 21 E., NW 1/4, NW 1/4, Sec. 17.

(All in G. & S. R. M.)

During the five weeks' period of publication of this notice or any time thereafter and before final approval and certification this office will receive protests or contests as to any of the tracts applied for and transmit the same to the General Land Office.

Dated at Phoenix, Arizona, June 26th, 1919.

J. L. IRVIN, Register.

SCOTT WHITE, Receiver.

First pub. July 13, 1919.

NOTICE FOR PUBLICATION

Department of the Interior

U. S. Land Office at Phoenix, Arizona, June 11, 1919.

Notice is hereby given that Arthur Funk, of Turner, Arizona, who, on April 19, 1915, made Homestead Entry No. 927265, for lots 1, 2, 3, and 4, S 1/2 N 1/2, Section 5, Township 20-S, Range 20-E, G. & S. R. B. & Meridian, has filed notice of intention to make three year proof, to establish claim to the land above described, before W. A. Fowler, U. S. Commissioner, at Tombstone, Arizona, on the 17th day of July, 1919.

Claimant names as witnesses:

Thomas D. M. Larrion, John Rock, Louis A. Roedecker, Ernest Graf, all of Turner, Arizona.

J. L. IRVIN, Register.

First pub. June 15, 1919.

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh. Catarrh being greatly influenced by constitutional conditions requires constitutional treatment. Hall's Catarrh Cure is taken internally and acts through the blood on the mucous surfaces of the system thereby destroying the foundation of the disease, giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in the curative powers of Hall's Catarrh Cure that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: F. J. CHENEY & CO., Toledo, Ohio. Sold by all Druggists, etc.

Republication

UNITED STATES LAND OFFICE, AT PHOENIX, ARIZONA

State of Arizona

TO WHOM IT MAY CONCERN:
